

**AMENDMENTS TO THE CLAIMS**

Claims 1-6 (Canceled)

7. (New) A wing mirror unit, in particular for a motor vehicle, comprising a mirror foot for attachment to the body of a motor vehicle, and a mirror housing connected with the mirror foot, which mirror housing is adjustable with respect to the mirror foot between a folded orientation, in which the mirror housing substantially extends along the body of the motor vehicle, and an unfolded orientation, in which the mirror housing is substantially oriented transversely to the body, which wing mirror unit is further provided with an actuator, which is arranged to move adjacent surfaces of the mirror housing and the mirror foot transversely to each other between a first position, in which the adjacent surfaces of the mirror housing and the mirror foot enclose a slit, and a second position, in which the adjacent surfaces abut each other and the outer contours of the mirror foot and the mirror housing connect substantially flowingly.
